

### Closed City of Madison Landfills

With the goal of protecting both public health and the environment, the City of Madison supervises the monitoring, operation, and maintenance of five closed landfills. Underground landfill gas extraction and leachate collection systems operate at these sites 24 hours per day. Landfill gas probes around each landfill are monitored at least weekly by City Engineering. A network of groundwater wells is sampled twice per year by Public Health – Madison & Dane County. All activities are supervised by the Wisconsin Department of Natural Resources, and data are submitted to the WDNR regularly for agency review.

**Address:**

126 South Yellowstone Drive

**Hours:** 4:00am - 10:00pm

**Park Type:** Open Space

**Acres:** 9.85

**Restroom:** No

**Drinking Water:** No
